

COMMITTED TO IT TRANSFORMATION SUCCESS

Assurance through ownership by recognized, award winning authorities on IT change

We act as impartial representatives for the sponsor, owner of the business case, and bring to the table – hard won experience that allows us to help you get that business case delivered. Without constant tension and instigating a positive mind-set.

Our target group of customers are those preparing for a large IT transformation and those whose IT transformation is not delivering expected outcomes (Requirements, Quality, On Time, Within Budget). It goes wrong so many times...

With Stability and Cybersecurity as focus, we deliver IT Change for Business by being accountable. Substantiated by our proprietary CSD Framework and Data Centre Migration Methodology which include a comprehensive set of Lessons Learnt and perfected templates.

“We take the success of IT Transformation personally”

Ideally, engage us BEFORE it goes wrong. But once in-flight, our expertise can also be applied to perform a consummate, honest review of your transformation.

It is about Best Practice. Quality. And in contrast to large consultancy firms we do take ownership, based on 50 years of hands-on experience and project delivery.

- ✓ Clarification and Understanding of the solution/product/service (what did you actually buy??)
- ✓ A motivated team, delivering a non-conflict project
- ✓ Saving money / costs
- ✓ Assuring the right decisions/solution
- ✓ Assuring the desired outcome
- ✓ Delivering valued quality
- ✓ Meeting business needs
- ✓ Underwriting of the planning/timeline

There are many more than 13 ingredients, but this article is a good starting point:
